

ACRYL-STAR CORRECT CLEANING & CARE

FACELIFT FOR THE BATHROOM

High-grade acrylic bathtubs require special care. Improper or even abrasive detergents affect the brilliance and shine of the acrylic bathtubs and the surface will become dull and matt. Our Acryl-Star removes ugly discolourations, stains and limescale from these surfaces and polishes the surfaces at the same time, due to its novel formula made of specific detergent in combination with polishing bodies. Even deeper scratches can be ground with the enclosed sand paper before polishing it again to get back the shine. Just recommend Cramer Acryl-Star to your customers, if they want to do a brush-up of their bathroom.

PRODUCT INFORMATION:
