

EMAIL-STAR CORRECT CLEANING & CARE

CLEANING THE GENTLE WAY

Your customers have spent quite some money on their bathroom and therefore would like to keep the ceramic and enamel surfaces shiny and brilliant as long as possible. This intention is highly commendable, however, pitfalls are lurking everywhere. Who informs the customer how to clean which surfaces the right way? Commercial sanitary detergents often affect bathtubs and washing basins: the surfaces become dull and the glaze is damaged. Better recommend the Cramer Email-Star to your customers. A compound uniquely developed for ceramic and enamel surfaces and their professional cleaning and care. The paste is acid free and the polishing body which is included provides for a sustainable and gentle cleaning. Your customer will certainly accept and appreciate your professional advice.
